ABOUT

Full-stack developer with ~4 years of experience building scalable **web and mobile applications** using **Node.js**, **React**, **React Native**, **GraphQL**, **PostgreSQL**, and **GCP**.

Experienced in designing **stateless backend services**, **background job processing systems**, **API-driven architectures**, **pub/sub communication** and **scalable cloud deployments**.

Strong focus on **performance optimization**, **automation**, **clean architecture** and building **maintainable production-ready systems**.

WORK EXPERIENCE

Summer Bash

Full-stack Developer (Freelancer since 2025) • Belgium - Antwerp • Apr. 2024 - Present

Event-Driven Email Notification System

Built scalable email automation using Pub/Sub architecture and cron jobs. Coordinated cross-repository communication for event-driven notifications.

Node.js | Pub/Sub | GCP | Cloud Scheduler | Cron

High-Performance Bookings Processor

Implemented worker thread-based processing to handle high-volume booking operations efficiently. Optimized concurrent request handling for peak traffic loads.

Node.js | Pub/Sub | GCP | Worker Threads | Cloud Scheduler

Booking Flow Redesign

Rebuilt entire booking flow based on a professional UI/UX FIGMA redesign. Modernized traveller account management with contemporary frameworks, improving conversion rates.

React | GraphQL | Mollie | TypeScript | Modern design system

Traveller Mobile Application

Developed full-featured mobile app for trip management with integrated payment gateway. Implemented upselling flows and secure payment processing.

React Native | Expo | GraphQL | Mollie | User Verification Flow

Data Flow Infrastructure

Developed a booking and seat assignment system for flights and buses, handling automatic allocation logic and keeping availability consistent across reservations.

Cloud Functions | GraphQL | REST API | PostgreSQL | Node.js

CMS & Internal Tools

Contributed to custom management dashboard development. Built internal tools for digitizing and automating manual operational tasks.

React | Node.js | GraphQL | REST API | PostgreSQL | GCP

AOMVSR a.s.

Full-stack Developer • Slovakia - Bratislava • Oct. 2022 - Apr. 2024

Developed nationwide firefighter management platform using React, Node.js, and Sequelize.
Designed features to streamline firefighter registration and data management.
Improved platform scalability and security, ensuring compliance with government IT standards.

SKILLS & TECHNOLOGIES

Frontend

React · React-Native · Expo · TypeScript · Styled Components

Backend

Node.js · Express · GraphQL · Redis · Jest · Sequelize · MongoDB · PostgreSQL · TypeORM · MariaDB

DevOps

GCP · CI/CD · Ansible · Git

Cloud

Google Cloud Run · Serveless patterns · Cloud-native systems · Web Sockets · Pub/Sub

Architecture

Background jobs · Worker threads · Scalable systems · Automation

EDUCATION

Thomas More University

Bachelor in Software Development • Belgium - Mechelen • 2019 - 2022

Studied **software development** with a focus on **modern web frameworks** and **digital product design**. In addition to development, I also gained knowledge in **design principles**, including **color theory**, **SEO** and **usability best practices**.

Internship - PixelLab

Belgium - Brugge • 2021 - 2022

As part of my Bachelor's program, I completed a **three-month internship** where I learned to work with **Ruby on Rails**. During this time, I was tested on my coding skills and **gained hands-on experience in web development using Ruby**.

LANGUAGES & INFO

Languages

- Dutch C2 (Native)
- English C2 (Fluent)
- French B1 (Intermediate)
- Slovak Beginner (Learning)

Additional Information

Work authorization:	EU Citizen, Belgian Nationality
Work model:	Remote / Hybrid preferred
Employment type:	Freelance / Full-time
Drivers license:	B
